Storminess and Environmental Change: Climate Forcing and Responses in the Mediterranean Region (Advances in Natural and Technological Hazards Research)

Storminess and Environmental Change: Climate Forcing and Responses in the Mediterranean Region (Advances in Natural and Technological Hazards Research)

This book describes recent developments in the modeling of hydro-climatological processes in time and space. The topic brings together a wide range of disciplines, such as climatology, hydrology, geomorphology and ecology, with examples of problems and related modeling approaches. Parsimonious hydro-climatological models hold the potential to simulate the combined effects of rainfall intensity and distribution patterns in the absence of precipitation records for short time intervals (e.g. daily to sub-hourly) and over large areas (e.g. regional to continental). In this book, we show how the principle of parsimony can be followed without sacrificing depth in seeking to understand a variety of landscape and surface processes that include hydrologic phenomena. Geographically speaking, the focus of the book is on Mediterranean environments. In this region, which is characterized by a complex morphology, soil erosion by water is a major cause of landscape degradation and the fragility of ecosystems is abundantly documented. By exploring interactions between erosive storms and land with the help of modeling solutions created at a variety of scales, the book investigates in detail the climatic implications for the Mediterranean landscape in an effort to bridge historical and contemporary research, which makes it unique in its approach.

The book provides a valuable resource for environmental scientists, while also providing an important basis for graduate and postgraduate students interested in research on hydrological cycles and environmental changes.

From reader reviews:

Amy Dixon:

In this 21st hundred years, people become competitive in each and every way. By being competitive at this point, people have do something to make them survives, being in the middle of the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Sure, by reading a publication your ability to survive raise then having chance to stand than other is high. For yourself who want to start reading the book, we give you that Storminess and Environmental Change: Climate Forcing and Responses in the Mediterranean Region (Advances in Natural and Technological Hazards Research) book as nice and daily reading e-book. Why, because this book is more than just a book.

Mary Block:

Your reading sixth sense will not betray an individual, why because this Storminess and Environmental Change: Climate Forcing and Responses in the Mediterranean Region (Advances in Natural and Technological Hazards Research) publication written by well-known writer we are excited for well how to make book that may be understand by anyone who else read the book. Written throughout good manner for you, dripping every ideas and producing skill only for eliminate your personal hunger then you still hesitation Storminess and Environmental Change: Climate Forcing and Responses in the Mediterranean Region (Advances in Natural and Technological Hazards Research) as good book not just by the cover but also from the content. This is one publication that can break don't determine book by its protect, so do you still needing a different sixth sense to pick this kind of!? Oh come on your reading sixth sense already said so why you have to listening to another sixth sense.

Alan Robert:

What is your hobby? Have you heard that question when you got pupils? We believe that that query was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. So you know that little person like reading or as reading become their hobby. You should know that reading is very important as well as book as to be the issue. Book is important thing to add you knowledge, except your own teacher or lecturer. You see good news or update with regards to something by book. Different categories of books that can you choose to adopt be your object. One of them is niagra Storminess and Environmental Change: Climate Forcing and Responses in the Mediterranean Region (Advances in Natural and Technological Hazards Research).

Alan Trevino:

Reading a guide make you to get more knowledge from it. You can take knowledge and information from the book. Book is written or printed or created from each source that filled update of news. In this modern era like today, many ways to get information are available for an individual. From media social similar to

newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just looking for the Storminess and Environmental Change: Climate Forcing and Responses in the Mediterranean Region (Advances in Natural and Technological Hazards Research) when you required it?
