Presently there is no single publication available which covers the topics related to photovoltaic (PV) or photovoltaic thermal (PV/T) technologies, thermal modelling, CO₂ mitigation and carbon trading. This book disseminates the current knowledge in the fundamentals of solar energy, photovoltaic (PV) or photovoltaic thermal (PV/T) technologies, energy security and climate change and is aimed at undergraduate and postgraduate students and professionals. The main emphasis of the book is on the design, construction, performance and application of PV and PV/T from the electricity and thermal standpoint. Hot topics covered in the book include: energy security of a nation, climate change, CO₂ mitigation and carbon credit earned by using PV or PV/T technologies (Carbon Trading). This information will prove helpful in filling the gap between the researchers and professionals working on the application of photovoltaic and global climate change. It also covers economic, cost effective and sustainable aspects of photovoltaic technologies. The book gives a detailed history of the new technological developments in PV/T systems worldwide with system photographs and references and elaborates on the fundamentals of hybrid systems and their performances with thermal modelling. Energy and exergy analysis, techno-economic analysis and carbon trading are key chapters for research professionals. The book also includes important case studies to aid understanding of the subject for all readers.

From reader reviews:

William Fiscus:

Now a day individuals who Living in the era just where everything reachable by interact with the internet and the resources included can be true or not require people to be aware of each data they get. How individuals to be smart in having any information nowadays? Of course the solution is reading a book. Reading through a book can help individuals out of this uncertainty Information particularly this Fundamentals of Photovoltaic Modules and their Applications: RSC (RSC Energy Series) book as this book offers you rich info and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it as you know.

Melanie Ratcliff:

Hey guys, do you wishes to finds a new book to learn? May be the book with the subject Fundamentals of Photovoltaic Modules and their Applications: RSC (RSC Energy Series) suitable to you? The book was written by well-known writer in this era. The book untitled Fundamentals of Photovoltaic Modules and their Applications: RSC (RSC Energy Series)is one of several books this everyone read now. This specific book was inspired many people in the world. When you read this guide you will enter the new way of measuring that you ever know ahead of. The author explained their concept in the simple way, therefore all of people can easily to understand the core of this reserve. This book will give you a wide range of information about this world now. So you can see the represented of the world in this particular book.

Paul Cockrell:

The book untitled Fundamentals of Photovoltaic Modules and their Applications: RSC (RSC Energy Series) contain a lot of information on it. The writer explains the girl idea with easy approach. The language is very straightforward all the people, so do certainly not worry, you can easy to read the item. The book was authored by famous author. The author will take you in the new time of literary works. If you want to buy the e-book, you can open their official web-site and order it. Have a nice go through.

Katie Harper:

You can spend your free time you just read this book this book. This Fundamentals of Photovoltaic Modules and their Applications: RSC (RSC Energy Series) is simple to deliver you can read it in the playground, in the beach, train and also soon. If you did not have much space to bring often the printed book, you can buy the particular e-book. It is make you better to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.
