Excerpt from Water Management Planning in the Central Valley Project: Developed to Meet the 1996
Standard Criteria for Evaluating Water Management Plans

These "Criteria for Evaluating Water Management Plans" (Criteria) were developed by the US Bureau of Reclamation (Reclamation) in response to the Central Valley Improvement Act of 1992 (CVPIA) and in accordance with the Reclamation Reform Act of 1982 (RRA).

All agencies (Districts) that contract with Reclamation for Municipal & Industrial (M&I) water in excess of 2,000 acre feet and/or for Agricultural (irrigation) water to serve over 2,000 irrigable acres will be evaluated based on the required information detailed in the steps listed below. The steps are:

1. Describe the District
2. Inventory Water Resources Available to the District
3. Best Management Practices (BMPs) for Agricultural Contractors
 - a. Non-exemptible BMPs
 - b. Exemptible BMPs
4. Best Management Practices for Urban Contractors
 - a. Non-exemptible BMPs
 - b. Exemptible BMPs
5. Exemption Process

If some data called for in the Criteria are not available, the District shall include in its plan how the District will gather the data and have it available for the next plan update.

Background And General Information

Section 210 of the RRA requires districts with certain types of Bureau of Reclamation contracts to prepare and submit Water Management Plans (Plans) with definite goals, appropriate water conservation measures, and timetables. "Guidelines" for preparing these Plans were prepared and are updated by Reclamation, Mid-Pacific Region every 5 years. Districts were asked to submit updated Plans every 5 years to reflect the specifics in the revised Guidelines.

Section 3405 (e) of the CVPIA requires that the Secretary of the Interior establish criteria to evaluate Plans by April 30, 1993, and that these Criteria be reviewed and revised, if necessary, at least every 3 years.

This law specifies that the Criteria identify best management practices (BMPs) including, but not limited to, efficient water management practices being developed according to California State law or reasonable alternatives. In addition, the Criteria are to grant substantial deference to the recommendations included in A Management Plan for Agricultural Subsurface Drainage and Related Problems on the Westside San Joaquin

Valley (September 1990).

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
