Monitoring Forest Biodiversity: Improving Conservation through Ecologically-Responsible Management (The Earthscan Forest Library) Toby Gardner

The fate of much of the world's terrestrial biodiversity depends upon our ability to improve the management of forest ecosystems that have already been substantially modified by humans. Monitoring is an essential ingredient in meeting this challenge, allowing us to measure the impact of different human activities on biodiversity and identify more responsible ways of managing the environment. Nevertheless many biodiversity monitoring programs are criticised as being little more than 'tick the box' compliance exercises that waste precious resources and erode the credibility of science in the eyes of decision makers and conservation investors. The purpose of this book is to examine the factors that make biodiversity monitoring programs fail or succeed.

The first two sections lay out the context and importance of biodiversity monitoring, and shed light on some of the key challenges that have confounded many efforts to date. The third and main section presents an operational framework for developing monitoring programs that have the potential to make a meaningful contribution to forest management. Discussion covers the scoping, design and implementation stages of a forest biodiversity monitoring program, including defining the purpose, goals and objectives of monitoring, indicator selection, and the process of data collection, analysis and interpretation. Underpinning the book is the belief that biodiversity monitoring should be viewed not as a stand-alone exercise in surveillance but rather as an explicit mechanism for learning about how to improve opportunities for conservation. To be successful in this task, monitoring needs to be grounded in clear goals and objectives, effective in generating reliable assessments of changes in biodiversity and realistic in light of real-world financial, logistical and social constraints.

From reader reviews:

Patricia Watts:

Do you certainly one of people who can't read pleasurable if the sentence chained inside the straightway, hold on guys that aren't like that. This Monitoring Forest Biodiversity: Improving Conservation through Ecologically-Responsible Management (The Earthscan Forest Library) book is readable simply by you who hate the perfect word style. You will find the data here are arrange for enjoyable reading through experience without leaving perhaps decrease the knowledge that want to offer to you. The writer associated with Monitoring Forest Biodiversity: Improving Conservation through Ecologically-Responsible Management (The Earthscan Forest Library) content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the content material but it just different in the form of it. So , do you nonetheless thinking Monitoring Forest Biodiversity: Improving Conservation through Ecologically-Responsible Management (The Earthscan Forest Library) is not loveable to be your top list reading book?

Kristen Wright:

In this period of time globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The health of the world makes the information better to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher which print many kinds of book. The particular book that recommended to you personally is Monitoring Forest Biodiversity: Improving Conservation through Ecologically-Responsible Management (The Earthscan Forest Library) this reserve consist a lot of the information of the condition of this world now. This book was represented just how can the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. The particular writer made some exploration when he makes this book. Here is why this book acceptable all of you.

Tracy Rojas:

Don't be worry for anyone who is afraid that this book may filled the space in your house, you may have it in e-book means, more simple and reachable. This specific Monitoring Forest Biodiversity: Improving Conservation through Ecologically-Responsible Management (The Earthscan Forest Library) can give you a lot of buddies because by you investigating this one book you have issue that they don't and make a person more like an interesting person. That book can be one of a step for you to get success. This book offer you information that maybe your friend doesn't know, by knowing more than various other make you to be great people. So , why hesitate? We should have Monitoring Forest Biodiversity: Improving Conservation through Ecologically-Responsible Management (The Earthscan Forest Library).

Kim Nielsen:

What is your hobby? Have you heard that question when you got learners? We believe that that concern was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. So you know that

little person such as reading or as studying become their hobby. You must know that reading is very important as well as book as to be the issue. Book is important thing to provide you knowledge, except your current teacher or lecturer. You find good news or update in relation to something by book. Amount types of books that can you take to be your object. One of them is niagra Monitoring Forest Biodiversity: Improving Conservation through Ecologically-Responsible Management (The Earthscan Forest Library).
