Reshaping Economic Geography in East Asia

Reshaping Economic Geography in East Asia

This companion volume to the 'World Development Report 2009' comprises twenty papers authored by noted Asian scholars. These studies highlight how, throughout East Asia, spatial considerations have influenced Government policies at the national, regional, and local levels. Key themes include how countries have dealt with:

- (1) agglomeration economies, urbanization, and regional disparities;
- (2) improving connectivity with infrastructure investments; and
- (3) eliminating barriers across and within countries to favor the movement of labor, goods and services.

Achievements vary widely across countries: while some succeeded in enhancing competitiveness and improving social outcomes, others are experiencing increasing inequalities and failures to spur growth in disadvantaged areas. The book highlights many examples of how the new economic geography is reshaping development objectives: from initiatives to foster growth via enhanced agglomeration and improved local connectivity to the world economy, to special decentralization programs that channel resources to lagging regions.

This volume will be of great interest to readers working in the areas of economic policy, poverty reduction and urban-rural development strategies, and transport-led infrastructure policy.
