A. John Bailer PhD

## **Statistical Programming in SAS** A. John Bailer PhD

In *Statistical Programming in SAS*, author A. John Bailer integrates SAS tools with interesting statistical applications and uses SAS 9.2 as a platform to introduce programming ideas for statistical analysis, data management, and data display and simulation. Written using a reader-friendly and narrative style, the book includes extensive examples and case studies to present a well-structured introduction to programming issues.

This book has two parts. The first part addresses the nuts and bolts of programming, including fostering good programming habits, getting external data sets into SAS to construct an analysis data set, generating basic descriptive statistical summaries, producing customized tables, generating more attractive output, and producing high-quality graphical displays. The second part emphasizes programming in the context of a DATA step, in macros, and in SAS/IML software.

Examples of statistical methods and concepts not always encountered in basic statistics courses (for example, bootstrapping, randomization tests, and jittering) are used to illustrate programming ideas. This book provides extensive illustrations of the new statistical graphics procedures in SAS, a description of the new ODS Graphics Editor, and an introduction to some of the capabilities of SAS/IML Studio, such as producing dynamically linked data displays and invoking R from SAS.

### **From reader reviews:**

#### **Frankie Evans:**

Have you spare time for a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a stroll, shopping, or went to typically the Mall. How about open or read a book entitled Statistical Programming in SAS? Maybe it is being best activity for you. You realize beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with the opinion or you have some other opinion?

#### **Andre Rosier:**

Here thing why this specific Statistical Programming in SAS are different and reliable to be yours. First of all looking at a book is good but it really depends in the content of computer which is the content is as tasty as food or not. Statistical Programming in SAS giving you information deeper and different ways, you can find any publication out there but there is no publication that similar with Statistical Programming in SAS. It gives you thrill looking at journey, its open up your personal eyes about the thing in which happened in the world which is perhaps can be happened around you. It is easy to bring everywhere like in playground, café, or even in your technique home by train. If you are having difficulties in bringing the branded book maybe the form of Statistical Programming in SAS in e-book can be your alternative.

#### **Gwen Dawes:**

Information is provisions for anyone to get better life, information presently can get by anyone at everywhere. The information can be a know-how or any news even a problem. What people must be consider when those information which is inside former life are difficult to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you obtain the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Statistical Programming in SAS as your daily resource information.

#### **Adriana Cornell:**

The book untitled Statistical Programming in SAS contain a lot of information on this. The writer explains the woman idea with easy technique. The language is very straightforward all the people, so do not worry, you can easy to read the item. The book was published by famous author. The author brings you in the new time of literary works. You can read this book because you can continue reading your smart phone, or product, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site along with order it. Have a nice study.
