**Fortran 90 For Engineers** Delores M. Etter

\* Five-step problem solving process. A five-step methodology for solving problems is used throughout the text. Each step is clearly identified to help students focus on the process of breaking a problem into smaller components and then addressing the smaller components throughout the text. The five steps are:

- \* State the problem clearly.
- \* Describe the input and the output.
- \* Work the problem by hand (or with a calculator) for a specific set of data.
- \* Develop a solution that is general in nature.
- \* Test the algorithm with a variety of data sets.

\* Key Topics Covered - arithmetic computations, control structures, array processing, external procedures, and data types, and pointers.

\* Includes real-world applications throughout.
