**ALERT:** Before you purchase, check with your instructor or review your course syllabus to ensure that you **select the correct ISBN**. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, **you may need a CourseID**, provided by your instructor, to register for and use Pearson's MyLab & Mastering products.

## Packages

Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase.

## Used or rental books

If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code.

## Access codes

Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase.

--

This extensively updated text and reference illuminates the modern realities of planning and constructing buildings with efficient, sustainable mechanical and electrical systems. Throughout, the authors place mechanical and electrical systems design in the overall context of the built environment. They extensively address engineers' teamwork with architects, owners, and facility managers to provide high-quality, productive environments which reflect both environmental and cost concerns. Focusing on the "what," "why," and "how" of ME systems, they incorporate new developments in all major disciplines, including electrical, lighting, telecom, plumbing and HVAC. New coverage in this edition includes: HVAC design using VRF and chilled beam technologies; energy reclaim systems; dedicated outside air systems; assessment of solar thermal system efficiency; new fuel cell technology; updates on the economics of cogeneration, and much more.
